Representation Matters!

Clinical trials can help anyone but did you know everyone is not equally represented?

Rates of participation for some racial/ethnic groups are much lower than others.

The percentages for clinical trials participation are:

- 83% for Caucasians
- 6% for African Americans
- 3% for Asian Americans
- 2% for Hispanics

The percentages for clinical trials participation are:

- 83% for Caucasians
- 6% for African Americans
- 3% for Asian Americans
- 2% for Hispanics

Treatments work differently in people. It is important to understand how ALL people respond to them. So, representation from ALL people is vitally important.

Representation Matters!

Make sure you and your community are represented in lung cancer research studies that can lead to new treatments.
